

G6RL

PCB Power Relay

Low-profile 12.3 mm height power relay with maximum switching of 10A

- Low profile: 12.3 mm in height
- Max. switching capacity: 2,500 VA (NO)
- Dielectric strength: 5 kV
- Clearance and creepage distance: 10 mm.
- Models with high shock resistance (250 m/s²) are available.
- Models for P1 load (2 x 200 W lamps parallel to ignition transformer) are available.

RoHS Compliant

Failure rate (P level) (reference value) *3	10 mA at 5 VDC	
Ambient operating temperature	-40°C to 85°C (with no icing or condensation)	
Ambient operating humidity	5% to 85%	
Weight	Approx. 7.8 g	

Note. The given values are initial values.

*1. Measurement conditions: 5 VDC, 1 A, voltage drop method.

*2. Measurement conditions: The insulation resistance was measured with a 500 VDC megohmmeter at the same locations as the dielectric strength was measured.

*3. This value was measured at a switching frequency of 120 operations/min.

■Precautions

●Please refer to "PCB Relays Common Precautions" for correct use.

Correct Use

- The G6RL are net intended to be used in automotive applications (including two wheel vehicles).
- If the product is used in the following applications, consult your OMRON sales representative to check the necessary items according to the specification sheets. Also make sure the product is used within the specified ratings and performance ranges with an ample margin and implement safety measures, such as designing a safety circuit, to minimize danger should the product fail.
 - a. Outdoor use, uses involving potential chemical contamination or electrical interference.
 - b. Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, safety equipment, and equipment that could present a risk to human life or body.
 - c. Equipment requiring a high level of reliability, such as gas, water, or electrical supply systems.

• Application examples provided in this document are for reference only. In actual applications, confirm equipment functions and safety before using the product.
• Consult your OMRON representative before using the product under conditions which are not described in the manual or applying the product to nuclear control systems, railroad systems, aviation systems, vehicles, combustion systems, medical equipment, amusement machines, safety equipment, and other systems or equipment that may have a serious influence on lives and property if used improperly. Make sure that the ratings and performance characteristics of the product provide a margin of safety for the system or equipment, and be sure to provide the system or equipment with double safety mechanisms.

Note: Do not use this document to operate the Unit.
