# Notice for TAIYO YUDEN products

Please read this notice before using the TAIYO YUDEN products.

## REMINDERS

Product information in this catalog is as of October 2012. All of the contents specified herein are subject to change without notice due to technical improvements, etc. Therefore, please check for the latest information carefully before practical application or usage of the Products.

Please note that Taiyo Yuden Co., Ltd. shall not be responsible for any defects in products or equipment incorporating such products, which are caused under the conditions other than those specified in this catalog or individual specification.

- Please contact Taiyo Yuden Co., Ltd. for further details of product specifications as the individual specification is available.
- Please conduct validation and verification of products in actual condition of mounting and operating environment before commercial shipment of the equipment.
- All electronic components or functional modules listed in this catalog are developed, designed and intended for use in general electronics equipment.(for AV, office automation, household, office supply, information service, telecommunications, (such as mobile phone or PC) etc.). Before incorporating the components or devices into any equipment in the field such as transportation,( automotive control, train control, ship control), transportation signal, disaster prevention, medical, public information network (telephone exchange, base station) etc. which may have direct influence to harm or injure a human body, please contact Taiyo Yuden Co., Ltd. for more detail in advance. Do not incorporate the products into any equipment in fields such as aerospace, aviation, nuclear control, submarine system, military, etc. where higher safety and reliability are especially required.

In addition, even electronic components or functional modules that are used for the general electronic equipment, if the equipment or the electric circuit require high safety or reliability function or performances, a sufficient reliability evaluation check for safety shall be performed before commercial shipment and moreover, due consideration to install a protective circuit is strongly recommended at customer's design stage.

- The contents of this catalog are applicable to the products which are purchased from our sales offices or distributors (so called "TAIYO YUDEN's official sales channel").

  It is only applicable to the products purchased from any of TAIYO YUDEN's official sales channel.
- Please note that Taiyo Yuden Co., Ltd. shall have no responsibility for any controversies or disputes that may occur in connection with a third party's intellectual property rights and other related rights arising from your usage of products in this catalog. Taiyo Yuden Co., Ltd. grants no license for such rights.
- Caution for export

  Certain items in this catalog may require specific procedures for export according to "Foreign Exchange and Foreign Trade Control Law" of Japan, "U.S. Export Administration Regulations", and other applicable regulations. Should you have any question or inquiry on this matter, please contact our sales staff.

# LEADED COMMON MODE CHOKE COILS FOR DC AND SIGNAL LINES, LEADED COMMON MODE CHOKE COILS FOR AC LINES

## ■RELIABILITY DATA

1. Operating Tempe	erature Range							
epo. ading 1 ompt	BU-RA Type							
Specified Value		−25~+ 105°C						
Test Method and	TLH, TLF Type							
Remarks	Including temperature rise due to self—generated heat.							
2. Storage tempera	ture range							
C:E  \/-	BU-RA Type	40 I 05°C						
Specified Value	TLH, TLF Type	-40~+ 85°C						
3. Rated current								
Specified Value	BU-RA Type	Within the specified range						
Specified value	TLH, TLF Type	within the specified range	,					
Test Method and		e of AC current within the	_					
Remarks	1	e of AC current within the	•					
	TLF9UB : The maximum valu	e of DC current within the	temperature rise of 45 C					
4. Inductance	1							
Specified Value	BU-RA Type	Within the specified tolerance						
	TLH, TLF Type							
Test Method and Remarks	TLF9U:  Measuring equipment : Impedance analyzer (HP4192A) or its equivalent  Measuring frequency : 1kHz  Measuring voltage : 0.35Vosc  TLH, TLF (except TLF9U):  Measuring equipment : LCR meter 4284A or its equivalent  Measuring frequency : 1kHz							
	Measuring voltage : 1.0V							
5. DC resistance								
0 :0 17/1	BU-RA Type	West and the second						
Specified Value	TLH, TLF Type	Within the specified tolerance						
Test Method and	TLH, TLF:							
Remarks	Measuring equipment : DC ohmmeter							
6. Terminal strengtl	n tensile force							
Specified Value	BU-RA Type	No objection						
Specified Value	TLH, TLF Type	No abnormality						
	TLF9U : Apply the stated tensile force gradua	ally in the direction to draw	terminal.					
	Nominal wire diameter tensile $\phi$ d [mm]	force [N]	duration [s]					
Test Method and	φ 0.6	5	30±5					
Remarks	TLH, TLF (except TLF9U): Apply the stated t	ancila force gradually in th	direction to draw torreinal					
	Nominal wire diameter tensile $\phi$ d [mm]	force [N]	duration [s]					
	$\phi$ 0.8	10	30±5					
	F	1	I

Number of cycles : 10

Recovery : At least 1hr of recovery under the standard condition after the removal from test chamber, followed by the

measurement within 2 hrs.

16. Damp heat			
	BU-RA Type		
Specified Value	TLH, TLF Type		TLF9UA : Inductance change : Within ±15% TLH, TLF (except TLF9UA) : Withstanding voltage : No abnormality Insulation resistance : No abnormality
Test Method and Remarks	TLH, TLF: Temperature Humidity Duration Recovery	: 60±2°C : 40±2°C (※TLF14CB) : 90~95%RH : 500 hrs : At least 1hr of recovery un	nder the standard removal from test chamber followed by the measurement within 2 hrs.

17. Loading under d	lamp heat				
Specified Value	BU-RA Type	Appearance : No abnormality Inductance change : Refer to individual specification			
	TLH, TLF Type	Withstanding voltage: No abnormality Insulation resistance: No abnormality			
	TLH, TLF :				
	Temperature	: 60±2°C : 40±2°C (※TLF14CB)			
	Humidity	: 90∼95%RH			
Test Method and	Duration	: 100 hrs			
Remarks		: 500 hrs Apply rated current across windings (※TLF14CB)			
	Applied voltage	ltage : Apply the following specified voltage between windings.			
		TLF9UA 250VAC			
		TLF9UB 50VDC			
	Recovery	: At least 1hr of recovery under the standard removal from test chamber followed by the measurement within 2 hrs.			

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).

18. Low temperatur	e life test		
Specified Value	BU-RA Type		Appearance : No abnormality Inductance change : Refer to individual specification
	TLH, TLF Type		TLF9U : Inductance change : Within $\pm 15\%$ TLH, TLF (except TLF9U) : Withstanding voltage : No abnormality Insulation resistance : No abnormality
Test Method and Remarks	TLH, TLF : Temperature  Duration Recovery	: -25±2°C : -40±2°C (※TLF14CB) : 500 hrs : At least 1hr of recovery un	nder the standard removal from test chamber followed by the measurement within 2 hrs.

19. High Temperatu	ıre life test		
Specified Value	BU-RA Type		Appearance : No abnormality Inductance change : Refer to individual specification
	TLH, TLF Type		TLF9U : Inductance change : Within ±15% TLH, TLF (except TLF9U) : Withstanding voltage : No abnormality Insulation resistance : No abnormality
Test Method and Remarks	TLH, TL F: Temperature  Duration Recovery	: 85±2°C : 105±3°C (※TLF14CB) : 500 hrs : At least 1hr of recovery un	nder the standard removal from test chamber followed by the measurement within 2 hrs.

# LEADED COMMON MODE CHOKE COILS FOR DC AND SIGNAL LINES, LEADED COMMON MODE CHOKE COILS FOR AC LINES

#### **■**PRECAUTIONS

## 1. Circuit Design Operating environment 1. The products described in this specification are intended for use in general electronic equipment, (office supply equipment, telecommunications systems, measuring equipment, and household equipment). They are not intended for use in mission-critical Precautions equipment or systems requiring special quality and high reliability (traffic systems, safety equipment, aerospace systems, nuclear control systems and medical equipment including life-support systems) where product failure might result in loss of life, injury or damage. For such uses, contact TAIYO YUDEN Sales Department in advance. 2. PCB Design Design Precautions 1. Please design insertion pitches as matching to that of leads of the component on PCBs. ◆Design Technical 1. When Inductors are mounted onto a PC board, hole dimensions on the board should match the lead pitch of the component, if not, it will considerations cause breakage of the terminals or cracking of terminal roots covered with resin as excess stress travels through the terminal legs. 3. Soldering ◆Wave soldering 1. Please refer to the specifications in the catalog for a wave soldering. 2. Do not immerse the entire inductor in the flux during the soldering operation. Lead free soldering 1. When using products with lead free soldering, we request to use them after confirming of adhesion, temperature of resistance to Precautions soldering heat, etc. sufficiently. Recommended conditions for using a soldering iron Put the soldering iron on the land-pattern. Soldering iron's temperature – Below 350°C Duration – 3 seconds or less · The soldering iron should not directly touch the product. ◆Lead free soldering 1. If products are used beyond the range of the recommended conditions, heat stresses may deform the products, and consequently Technical degrade the reliability of the products. considerations ◆Recommended conditions for using a soldering iron If products are used beyond the range of the recommended conditions, heat stresses may deform the products, and consequently degrade the reliability of the products. 4. Cleaning ◆Cleaning conditions Precautions 1. TLF type Please contact any of our offices for about a cleaning. 5. Handling Handling 1. Keep the product away from all magnets and magnetic objects. Mechanical considerations 1. Please do not give the product any excessive mechanical shocks. 2. TLF type Precautions Please do not add any shock or power to a product in transportation. 1. Please do not give the product any excessive mechanical shocks. In loading, please pay attention to handling indication mentioned in a packing box (a loading direction / number of maximum loading / ◆Handling 1. There is a case that a characteristic varies with magnetic influence. Mechanical considerations Technical 1. There is a case to be damaged by a mechanical shock. considerations 2. TLF type There is a case to be broken by a fall. **◆**Packing

1. There is a case that a lead route turns at by a fall or an excessive shock.

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).

#### 6. Storage conditions ◆Storage 1. To maintain the solderability of terminal electrodes and to keep the packing material in good condition, temperature and humidity in the storage area should be controlled. Recommended conditions Ambient temperature : 0~40°C Precautions Humidity: Below 70% RH The ambient temperature must be kept below 30°C. Even under ideal storage conditions, the solderbility of electrodes decreases gradually, so the products should be mounted within one year from the time of delivery. In case of storage over 6 months, solderability shall be checked before actual usage. **♦**Storage Technical 1. Under a high temperature and humidity environment, problems such as reduced solderability caused by oxidation of terminal electrodes considerations and deterioration of taping/packaging materials may take place.
