

High Voltage Goldmax, 300 Series, Conformally Coated, C0G Dielectric, 500 – 3,000 VDC (Commercial Grade)

Overview

KEMET's 300 Series High Voltage Goldmax conformally coated radial led ceramic capacitors in C0G dielectric feature a 125°C maximum operating temperature. The Electronics Industries Alliance (EIA) characterizes C0G dielectric as a Class I "stable" material. Components of this type are used in industries related to telecommunications, medical, Military, Space, Semiconductor and Test/Equipment. C0G exhibits no change in capacitance with respect to time and voltage and boasts a negligible change in capacitance with reference to ambient temperature. Capacitance change is

These devices exhibit low ESR at high frequencies and

' 7 T H & E M P W

- Radial leaded form factor
- Conformally coated
- 0.100", 0.200", 0.250", and 0.400" lead spacing
- Lead (Pb)-free, RoHS and REACH compliant
- DC voltage ratings of 500 V, 630 V, 1 KV, 1.5 KV, 2 KV, 2.5 KV, and 3 KV
- Available capacitance tolerances of ±0.1 pF, ±0.25 pF, ±0.5 pF, ±1%, ±2%, ±5%, and ±10%
- High temperature solder lead attach
- Extremely low ESR and ESL
- High thermal stability
- High ripple current capability
- No capacitance change with respect to applied rated DC voltage
- Negligible capacitance change with respect to temperature
- No capacitance decay with time
- Non-polar device, minimizing installation concerns
- Excellent solderability (Sn60/Pb40)

Applications

equipment, industrial and medical equipment/control, LAN/WAN interface, analog and digital modems, and automotive.

Application Notes

These devices are not recommended for use in overmold applications and/or processes.

Tape & Reel Packaging Information

KEMET offers standard reeling of Molded and Conformally Coated Radial Leaded Capacitors in accordance with EIA standard 468. Parts are taped to a tagboard carrier strip, and wound on a reel as shown in Figure 1. Kraft paper interleaving is inserted between the layers of capacitors on
